LDA Osijek exists since 1993. Our activities are directed towards non formal education of local capacities, networking and dissemination of information. We have 2 main programmes: Promotion of European values and Promotion of local economic development. In the frame of the 1st program we initiate activities aimed at promoting European spirit and values in our local communities targeting first of all at young people but also at CSOs. We put special emphasis on inter-cultural dialogue and promotion of EU programmes available for young people supporting therefore their mobility and cross European experience. We introduced the Day of Europe in Osijek and then the European week.

Our 2nd program is implemented in the rural communities and it focuses on sustainable development and rural tourism as new models of rural development. We cooperate closely with LAs and so far we have achieved good results in the Erdut municipality. This project focuses on study visits, public events, education and microcredit.
