

## Training course on financial management & audit

Any project needs to be supported by adequate preparation, implementation and **monitoring at the financial level**. Such a financial exercise represents a crucial obstacle to most implementing agencies. An adequate preparation is therefore crucial for all beneficiaries, especially in the case of an **audit of the EU Commission**. An effective method and an organised approach thus guarantee to avoid losing resources and to gain credibility with other partners, citizens and European institutions. The course is designed for **associations, local authorities' representatives**, and in general, for all the **potential grantees** of European Commission.

**Our method? Let's go practical!** All classes are divided into face-to-face **theoretical lessons and practical exercises**. In order to assure the best possible quality, this course has a particularly restricted number of participants per class, enables a greater level of interaction.

### **Content**

Thanks to our course on financial management and audit you will acquire or improve competencies and skills to elaborate and **manage projects' budgets**; enhance your capacities for a qualitative drafting of the **final reports of the activities**; get the right preparation to successfully **overcome an audit** of the European Commission.
